

KIK'S SUBSCRIBER DATA GLOSSARY

We hope this document will be a useful tool for you. It includes an explanation of the data included in our response to your Order or Emergency Request.

If you have questions about the data that aren't answered in our glossary, you can reach out to us at lawenforcement@kik.com.

Subscriber data

Subscriber data is provided in response to a valid Order (i.e., a subpoena or warrant issued or an order made by a court, person or body with jurisdiction to compel the production of information) or an Emergency Request and may include:

- Basic subscriber information provided by the user, such as first and last name, email address, and link to current profile picture. *This information isn't verified by Kik.*
- Device related information. *This information varies depending on device type.*
- Kik account information such as account creation date and version.
- User location information, including most recent IP address (after November 2013). *This information isn't verified by Kik.*
- Date and time in Coordinated Universal Time (UTC)

We collect IP address information up to 30 days old. This information is provided by third parties and isn't verified by Kik.

The generation of an IP address is considered a **BIND**. A BIND is not necessarily associated to sending or receiving a Kik message.

- **Android:** A BIND is generated when a successful network connection is established. A new BIND will generate if the user force-closes and opens the app or changes Wi-Fi or data locations.
- **iOS:** A BIND is generated when a successful network connection is established. A new BIND will generate if the user force-closes and opens the app, change Wi-Fi or data locations, **or** when the user opens the app after it's been running in the background for longer than 10 minutes.

Below is a list of commonly found terms within subscriber data responses:

Basic Subscriber Data

Disclaimer: Kik cannot verify the accuracy of the timestamps associated to subscriber data when the account holder updates this data.

Current first/last name (Display name)	Provided by the user and can be changed at any time <ul style="list-style-type: none">▪ Not verified by Kik▪ Can contain spaces, emoticons, special characters
